

Pipelayer - Maintenance (2026-04)

33835 Dewdney Trunk Rd, Mission 1, BC V2V 4L9, Canada

Full-time

Division: Public Works

Department: Engineering & Public Works

Vacancy Status: Full-Time

Company Description

Mission is located on the unceded, ancestral, and shared territory of the Stó:lō Peoples, specifically on Leq'á:mel, Semá:th, Máthexwí, Kwantlen, Sq'éwlets, and Katzie traditional territories in the lower mainland of BC. Nestled on the southern coastal mountain slopes overlooking the lush Fraser River Valley, Mission is a rapidly growing and dynamic community of approximately 41,500 residents, 20 kilometers north of the US border and 70 kilometers east of Vancouver. Although Mission is part of a broader metropolitan area, it still maintains its distinct and welcoming small-town flavor.

Job Description

The City of Mission is seeking a Pipelayer to join our Engineering & Public Works team. This position performs semi-skilled and skilled work related to the installation, operation, maintenance, and repair of municipal water, sanitary, and storm utility systems, primarily focused on standard residential services.

Duties include installing and repairing water, sanitary, and storm services, maintaining manholes, catch basins, fire hydrants, and meters, drilling and tapping mains for service connections, completing minor cement work, and preparing surfaces for finishing work such as asphalt or concrete. The successful candidate will also be responsible for site safety and clean-up, operating tools and equipment, and maintaining accurate operational and "as constructed" records. Support tasks such as flagging and forklift operation may also be required.

Qualifications

The ideal candidate will have strong working knowledge of municipal utility maintenance practices and applicable Occupational Health & Safety regulations. They must be able to work in wet, dirty, and confined environments, including exposure to odours, fumes, and gases in areas such as manholes, culverts, and pump stations. This role requires physical strength, stamina, and coordination to perform heavy manual work outdoors in all weather conditions, as well as the ability to communicate effectively and work cooperatively with others.

You will be a high school graduate (or equivalent) and you also have post-secondary technical training related to this type of work and a minimum of two years' experience in all aspects of municipal or civil pipelaying work, or an equivalent combination of education and experience.

You will have completed Water Distribution System Operator Level 1 and Wastewater Collection System

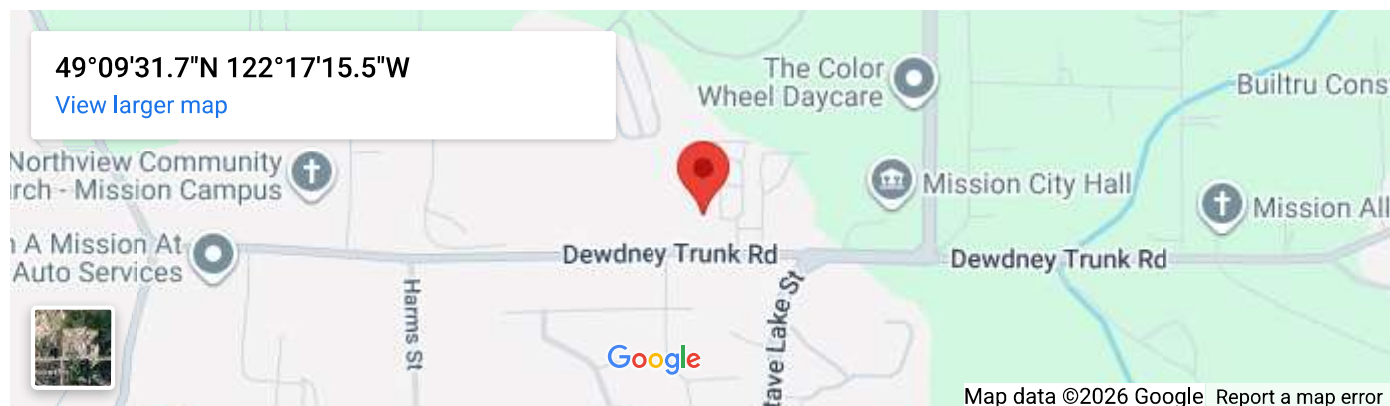

Operation Level 1 as per the BC Environmental Operators Certification program. You will have knowledge of the hazards and safety precautions of the work as it relates to current codes and standards. You must have your Traffic Control Person certification and a valid BC driver's license for the equipment operated. A valid forklift operator's certificate would be an asset.

Additional Information

The 2025 rate of pay for this CUPE position is \$35.24 per hour plus full benefits, including pension, upon completion of probation. The hours of work are 7:30 am to 5:00 pm (nine-hour shifts; 72 hours bi-weekly) on the Monday to Thursday shift.

Posting Closed: March 1, 2026
